## ADJUSTING SODIUM IN RECIPES

|  | FOOD ITEM | MEASURE | SODIUM MG <br> PER MEASURE | SODIUM MG <br> PER 50 SERVINGS |
| ---: | :---: | :---: | :---: | :---: |
| Table Salt | 1 PER | $2,325 \mathrm{mg}$ | 47 mg | 24 mg |
|  | 1 Tbsp | $6,975 \mathrm{mg}$ | 140 mg | 70 mg |
|  | 2 Tbsps | $13,950 \mathrm{mg}$ | 280 mg | 140 mg |
|  | $1 / 4$ cup | $27,900 \mathrm{mg}$ | 558 mg | 279 mg |
|  | $1 / 2$ cup | $55,800 \mathrm{mg}$ | 1116 mg | 558 mg |
|  | $3 / 4$ cup | $83,700 \mathrm{mg}$ | 1674 mg | 837 mg |
|  | 1 cup | $111,600 \mathrm{mg}$ | 2232 mg | 1116 mg |
| Low Sodium Beef Base | 1 Tbsp | 429 mg | 10 mg | 5 mg |
|  | $1 / 4$ cup | $1,717 \mathrm{mg}$ | 36 mg | 18 mg |
|  | $1 / 2$ cup | $3,434 \mathrm{mg}$ | 70 mg | 35 mg |
|  | $3 / 4$ cup | $5,151 \mathrm{mg}$ | 102 mg | 51 mg |
|  | 1 cup | $6,868 \mathrm{mg}$ | 168 mg | 69 mg |
| Low Sodium Chicken Base | 1 Tbsp | 257 mg | 6 mg | 3 mg |
|  | $1 / 4$ cup | $1,026 \mathrm{mg}$ | 22 mg | 11 mg |
|  | $1 / 2$ cup | $2,052 \mathrm{mg}$ | 42 mg | 21 mg |
| $3 / 4$ cup | $3,078 \mathrm{mg}$ | 62 mg | 31 mg |  |
| 1 cup | $4,104 \mathrm{mg}$ | 82 mg | 42 mg |  |
|  | 1 Tbsp | 323 mg | 8 mg | 4 mg |
| $1 / 4$ cup | $1,607 \mathrm{mg}$ | 34 mg | 17 mg |  |
| $1 / 2$ cup | $3,214 \mathrm{mg}$ | 66 mg | 33 mg |  |
| $3 / 4$ cup | $4,821 \mathrm{mg}$ | 98 mg | 49 mg |  |
| 1 cup | $6,428 \mathrm{mg}$ | 130 mg | 65 mg |  |

One of the major sources of sodium in food is salt. This table lists milligrams (mg) of sodium for common measures of table salt and of the low sodium bases.

## COLUMN 1

common ingredients that contain sodium
COLUMN 2
common measures used in food service COLUMN 3
milligrams of sodium for each common measure

## COLUMN 4

milligrams of sodium that would be added to a recipe if that measure was added to a recipe for 50 servings COLUMN 5
milligrams of sodium that would be added to a recipe if that measure was added to a recipe for 100 sevings

For example:
If two tablespoons of salt were added to a recipe that makes 100 servings, the amount of sodium increases by 140 milligrams of sodium per senving.

If salt or bases are added to a recipe, the nutritional analysis of that recipe has to be recalculated.

Numbers in table have been rounded up.
